

Camas Blooms in the spring.

William Clark wrote in his journal on September 20, 1805, "I set out early and proceeded on through a country arugged and beautiful as usual...."

Mountain Bluebird

Lewis and Clark Birder's Guide to Kamiah, Idaho and Surrounding Areas

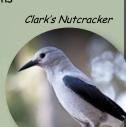

Lewis's Woodpecker

raptains Meriwether Lewis and William Clark called the Kamiah Valley a "paradise" and documented hundreds of bird species here along the banks of the Clearwater River.

Osprey soar and swoop over the river from their nests high in the great yellow pine, and warblers flit throughout the valley. Come and experience the joys of birding in the beautiful historic Kamiah Valley. Here the Nez Perce Indians found a winter home where the climate is mild, the salmon, trout and whitefish in the river were abundant. and nutritious bulbs and berries could and can be harvested nearby on the prairie and in the woodlands.

Here also the Nez Perce hosted the great explorers. Captains Meriwether Lewis and William Clark. for three weeks while they prepared to travel the Bitterroot Mountains toward home.

Evening Grosbeak

I hat birds you are Vable to see, will depend on the time of year you visit birder's luck, but you shouldn't have problems adding a species

or two to your life-list! As many as 56 species of birds can be sighted on a one-day birding trip in the Clearwater River area.

Birds such as the Stellar Jay, Black-Capped Chickadee, Wild Turkeys and the Red-Shafted Flicker are here year round. Seasonal visitors inleude warblers, finches, robins and many more.

September to April is the time for California Quail, Bald Eagles, Song White-Sparrows, Crowned Sparrows, Pine Siskins, House Finches and the Fox Sparrow. A special treat is to sit quietly along the river's bank

Black-Capped Chickadee

and watch the American Dipper eat and play in the water. Migrating flocks of Grosbeaks and Cedar Waxwings add joyous song and color to the spring and fall.

Waterfowl enjoy the Clearwater and its tributaries as much as humans, and throughout the spring and summer as many as 25 species can be seen in a day's travel.

Birding in Kamiah

walk through the Nez Perce National Historic Park "Heart of the Monster" site near East Kamiah along the Clearwater River's edge will afford opportunities to spot a variety of songbirds

and waterfowl as well as learn a

bit about the fabled origin of the Nez Perce Indian Tribe, the Nimiipuu.

On a scenic riverside trail beginning at the northeast corner of Riverfront Park is a second opportunity to spot many of these feathered friends as well.
